Mr. Todd Smith
Project Manager
Western Tank and Lining Ltd.
12180 Vickers Way
Richmond, BC
Canada V6V 1H9

File Number: 03.08

Dear Todd

RE: Recommendation

To Whom It May Concern:

Western Tank and Lining (WT&L) was contracted to erect a 2 million litre bolted steel potable water storage tank in British Columbia. WTL performed the work on schedule and within budget. The Project Manager was professional and knowledgeable with the client's requirements. The construction crew was very efficient and erected the tank in less time than shown on their construction schedule. The work was performed to the strictest of standards and the Engineer and Owner are more than satisfied with the professionalism on how the work was performed. Communication with WT&L was open and honest. I highly recommend WTL and would be pleased to work with them again.

Yours truly,

Allnorth
