To Whom It May Concern:

RE: **Western Tank and Lining Ltd.**  
**Letter of Reference**

Pidherney's and Western Tank and Lining Ltd. have worked together on numerous projects over the last 8 years. They have completed many different types of cell liner construction for us, which include, but not limited to HDPE liner, geocomposite, geomembrane, GCL, filter fabric as well as boot and tie-in installations.

We have worked together in different capacities, having Western Tank as a preferred sub-contractor as well as through novation agreements where the client has separate contracts with each party, yet we need to work together in order to complete the work.

Western Tank is a leader in the industry for liner installations and related work. They have very knowledgeable staff dedicated to meeting time lines, working diligently and together. They have a high standard within their organization to meet all requirements and their QC and QA is next to none. I would recommend them for any project requiring their services for successful completion.

Yours truly,

PIDHERNEY'S

Dave McLaughlin,  
Earthworks Construction Manager
